Publication 56/17

INTRODUCTION

This bulletin includes statistics for selected items by type-of-farming areas. Information tabulated on that basis may often be more useful in a study of agricultural problems than information presented on a census division or provincial basis.

Census sub-divisions 1/ were grouped into type of farming areas. Four primary types were established: livestock specialty, grain specialty, combination grain and livestock, and special crops. Each primary type was then divided into sub-types. For example, when 70 per cent or more of the gross farm revenue was obtained from the sale of livestock and livestock products, the census sub-division was classified as "livestock specialty". Within this specialty group, when 40 per cent or more of the revenue from the sale of livestock and livestock products was obtained from dairy, the sub-type was then called "livestock dairy".

A detailed type-of-farming map for Canada has been prepared and will appear in the Atlas of Canada 2/. The map was based on data from the 1951 Census of Agriculture, prepared by the Economics Division, Canada Department of Agriculture in co-operation with the Census Division, Dominion Bureau of Statistics. An outline map showing the location and approximate boundaries of the type of farming areas was transcribed from the detailed map for this bulletin.

1/ A province is divided into a number of census divisions composed of several sub-divisions which are usually townships in eastern Canada and municipalities in western Canada.

2/ The Atlas of Canada is being processed by the Canada Department of Mines and Technical Surveys.

The criteria for the various types of farming were:

1 - Livestock specialty . . . . . 70 per cent or more of the gross farm revenue was received from sales of livestock and livestock products.

Three sub-types:

a) livestock dairy (Ld). . . . sale of dairy products over 40 per cent of total sales of livestock and livestock products.

b) livestock cattle (Lc) . . . sale of cattle over 40 per cent of total sales of livestock and livestock products.

c) livestock general (Lg). . . neither the dairy products nor the cattle sales over 40 per cent of the total sales of livestock and livestock products.

2 - Grain specialty . . . . . 70 per cent or more of the gross farm revenue was received from sales of grain and hay.

Two sub-types:

a) grain general (Gg). . . . . no single crop acreage exceeds 40 per cent of total crop acreage.

b) wheat (Gw). . . . . wheat acreage exceeds 40 per cent of total crop acreage.

3 - Combination grain and livestock . . . . less than 70 per cent of gross farm revenue from either crops or livestock.

Two sub-types:

a) cash crop-livestock (CL). . gross revenue from cash crops and grain exceeds that from livestock.

b) livestock-cash-crop (LC). . gross revenue from livestock exceeds that from grain and cash crops.

4 - Special crops . . . . . 50 per cent or more of gross farm revenue was received from the special crops listed.

Three sub-types:

a) tobacco or potatoes (Spt) ..50 per cent or more of gross farm revenue from sales of tobacco, potatoes and other root crops.

b) fruits and vegetables (Sfv) 50 per cent or more of gross farm revenue from sales of fruits and vegetables.

c) forest products (F) . . . .50 per cent or more of gross farm revenue from sales of forest products.

E X P L A N A T O R Y N O T E S

O

The Provincial Total includes data for Indian Reserves and remote areas not included in the classified areas.

Definitions of the items listed in the tables are the same as the corresponding items in the Census Volume VI, 1951 with two slight modifications. In the tables:

a) Special crops include only the acreages of potatoes, tobacco, sugar beets and soybeans. This acreage combined with Main crops gives "area under crops" in the Census Volume.

b) Cows for milk and Cows and heifers for beef include only cows and heifers two years old and over.

A dash (-) indicates zero.

Area Number	Types-of-Farming Category	Name of Area
24	CL	Clear River
